Take Another Security Break

**More fun facts
and details from the
world of Information
Security!**

Once again it's time to "Take a SECURITY BREAK." As before, test your security knowledge or challenge your friends on theirs. If you're a security manager (or even if you're not), use parts of this book as fillers in your local bulletins or as quizzes in your next training class. But, just as with the first edition of SECURITY BREAK, the most important aspect is for you to HAVE FUN with this book.

Did you know:

1. The range of the Fahrenheit temperature scale was created by the German physicist Gabriel Daniel Fahrenheit with zero degrees representing the temperature of an equal ice-salt mixture and with 100 degrees supposedly signifying the normal body temperature²; while the range of information which is eligible for classification under EO 12958 includes
 - a. military plans or operations.
 - b. illegal acts which need public disclosure.
 - c. any fact that DoD wishes to keep from Congress.
 - d. all of the above.

2. The Savi pygmy shrew of the Mediterranean region is the world's smallest mammal¹; while a _____ is the smallest entity within a classified doc marked with the highest classification contained within it.
